

PPT Notes Compare

Your slides changed. Which speaker notes changed with them, and which slides need rerecording? This guide uses a pair of practice decks to walk through every button on the page, from start to finish. You can download both decks from the tool page and follow along.

Page: unjamkit.com/ppt-notes/

Sample files: training-deck-v1.pptx (earlier, 5 slides) and training-deck-v2.pptx (updated, 7 slides)

Each numbered red box in a screenshot matches the same number in the table below it.

Contents

1. What the tool does, and the overall workflow
2. Step 1: Choose a mode and load your files (01 / INPUT)
3. Step 2: Read the summary, filter and search (02 / REVIEW, top)
4. Step 3: Review each slide and decide (02 / REVIEW, workspace)
5. Step 4: Catch easy-to-miss problems (03 / CHECK)
6. Step 5: Export and reading mode (04 / TAKE IT)
7. One-deck mode
8. Saving and resuming your work
9. FAQ and limits

1. What the tool does, and the overall workflow

PPT Notes Compare reads the **speaker notes** on every slide of a PPTX (the “Click to add notes” area under each slide in PowerPoint). It then:

- **Compares two versions:** it pairs each updated slide with its earlier slide and highlights removed text (red, struck through) and added text (green).
- Lets you record a **decision** for each slide: To review, No rerecording, Record or Done.
- Flags **easy-to-miss problems**: uncertain page matches, empty notes, repeated notes, slide text that changed while the notes did not, and old terms that should be gone.
- **Exports** an HTML checklist, a recording script, all notes, or a project file, and offers a full-screen **reading mode** to read from while you record.

Privacy: files are read only inside your browser. Nothing is uploaded, no AI service is called, and nothing is stored automatically. Closing the tab discards your work, so use “Save project” if you want to continue later.

Recommended workflow:

1. Choose **Compare two versions**, load the earlier and updated PPTX, then click **Read speaker notes**.
2. Go through the slide list, starting with slides flagged **Check page match**. Confirm or correct each pairing.
3. Set each slide's **Decision** to Record or No rerecording.
4. In 03 / CHECK, enter old terms that should no longer appear, then deal with the flagged slides.
5. Export the recording script or HTML checklist, or open reading mode and start recording.

2. Step 1: Choose a mode and load your files

record, and take a checklist and full script with you.

01 / INPUT

Bring the deck.

Choose two versions to compare or one deck to export and inspect its notes.

PPTX only · up to 30 MB and 500 slides per deck · the example uses fictional content.

Figure 1. The input section (01 / INPUT)

	Button / area	What it does
1	Compare two versions	Compare mode (the default). Needs an earlier and an updated PPTX.
2	One deck	Single-deck mode. Load one PPTX to read, check and export its notes, with no comparison. See section 7.
3	Earlier PPTX	Click Choose File and pick the old version. Hidden in one-deck mode.
4	Updated PPTX	Pick the new version (called “Your PPTX” in one-deck mode).
5	Read speaker notes ↗	Reads and compares the files. If a required file is missing, it shows “Choose the required PPTX file(s) first.”
6	Try a sample	Loads a small built-in example, so you can explore the page without your own files.
7	Resume saved project	Opens a .json file saved earlier with Save project and restores where you left off. See section 8.
8	First time?	Download the two practice decks used in this guide (Earlier deck ↓ and Updated deck ↓) or open this PDF guide. The same files are in the “Learn it with a practice run” section further down the page.

Once you pick the files, their names appear in the two boxes (A and B):

record, and take a checklist and full script with you.

01 / INPUT

Bring the deck.

Choose two versions to compare, or one deck to export and inspect its notes.

Resume saved project

Read 7 slides. Check uncertain matches before exporting.

Figure 3. Files read successfully

3. Step 2: Read the summary, filter and search

Figure 4. Top of the review section (02 / REVIEW)

	Button / area	What it does
1	File summary	Shows “earlier file → updated file” and how many earlier slides were not matched to any updated slide (usually deleted slides).
2	Clear working data	Clears all results and chosen files and starts over. This cannot be undone , so save a project first if you need it.
3	NEW SLIDES	Number of slides in the updated deck.
4	NOTES CHANGED	Number of slides whose notes changed (new slides included).
5	TO REVIEW	Slides still marked “To review”. This drops as you make decisions.
6	TO RECORD	Slides marked “Record”.
7	Show filter	Show only one kind of slide: · All slides · Changed notes · To review: no decision yet · To record: marked Record · Needs attention: has a warning flag (see section 5)
8	Find	Search by page number, title or notes text. The slide list filters as you type.
9	Ignore whitespace-only changes	When ticked, notes that differ only in spaces or line breaks count as unchanged.

After reading, each slide gets a starting decision. Slides with changed notes, uncertain matches or no earlier match start as **To review**. All others start as **No rerecording**. These are only starting values; the final call is yours.

4. Step 3: Review each slide and decide

The workspace has the slide list on the left and the selected slide's details on the right. The first slide with changed notes is selected automatically.

The screenshot displays the UnjamKit workspace interface. On the left, a 'Slides' panel lists 7 slides. Slide 2, 'Delivery time', is highlighted with a red box and a red circle with the number 1. Below it, a red box with a red circle with the number 2 highlights the 'Check page match' button. The main workspace area on the right shows the details for 'UPDATED SLIDE 2 / 7'. At the top right, a red box with a red circle with the number 3 highlights the 'Check page match' button. Below it, a red box with a red circle with the number 4 highlights the 'Earlier slide' dropdown menu. To its right, a red box with a red circle with the number 5 highlights the 'Decision' dropdown menu, which is set to 'To review'. Below these, a red box with a red circle with the number 6 highlights the 'Confirm this page match' button. Below that, a red box with a red circle with the number 7 highlights the 'Inline changes' button. Below that, a red box with a red circle with the number 8 highlights the main content area showing the slide text: 'Standard delivery takes 7-10 days. Remind the customer to confirm the shipping address and phone number.' Below that, a red box with a red circle with the number 9 highlights the 'Copy updated notes' button.

Figure 5. Workspace: slide list and details (updated slide 2, "Delivery time")

	Button / area	What it does
1	A slide in the list	Click to open it. Each row shows the number and title, whether the notes changed (Changed notes / No notes change) and the current decision.
2	Orange flag	Warnings for this slide, such as Check page match (uncertain pairing).
3	Status badge	Shows the most important warning, or Notes changed / Notes unchanged when there is none.
4	Earlier slide	Which earlier slide this updated slide is paired with. Change it here if the pairing is wrong. For a brand-new slide, choose “No matching slide / new page”. Note: if the earlier slide you pick is already paired with another slide, that other slide is unpaired and set back to To review.
5	Decision	Your decision for this slide: · To review: not decided yet · No rerecording: changed, but no new recording needed · Record: needs recording · Done: recorded
6	Confirm this page match ✓	Appears only for uncertain pairings. Click it once you have checked the pairing is right, and the Check page match flag goes away.
7	Inline changes / Side by side	Switch how changes are shown: merged in one block, or old and new next to each other.
8	Changes	Red with strike-through is text removed from the earlier version; green is text added in the update. Here “7” became “10” and “and phone number” was added.
9	Copy updated notes	Copies this slide's full updated notes to the clipboard.

Side-by-side view

Click **Side by side** to see the earlier notes on the left and the updated notes on the right. This is easier to read when a slide changed a lot.

Figure 6. Side-by-side view

Confirm the pairing and mark Record

Once you have checked that slide 2 is paired correctly, click **Confirm this page match ✓** and set Decision to **Record**. The slide list updates right away (1): the flag is gone and the status reads Record (2).

Figure 7. After confirming the match and marking Record

A new slide with no earlier match

Slide 3, “Hands-on exercise”, is new in the updated deck. Earlier slide shows “No matching slide / new page” (1), and all of its notes show as added text (2). New slides usually need recording.

Figure 8. A new slide

Slide text changed, but the notes did not

Slide 5, “After-sales support”, was slide 3 in the earlier deck (it moved). The slide text changed from a support hotline to “Live chat, 24/7”, but the notes stayed the same, so the tool shows (1): **Slide text changed, notes did not**. This often means someone forgot to update the notes, so check the deck. If the pairing is right, click ☐ Confirm this page match ✓ (2).

5. Step 4: Catch easy-to-miss problems

The 03 / CHECK section under the workspace gathers these problems in one place.

03 / CHECK

Catch easy-to-miss notes.

Empty notes, repeated scripts, and your old terms are flagged for you to decide.

Old terms to find - one per line or comma

1 legacy system
7 days

2 1 without notes 2 with repeated notes 1 with listed terms 0 uncertain matches

Figure 10. The 03 / CHECK section

	Button / area	What it does
1	Old terms to find	Enter wording that is out of date and should no longer appear , one per line or separated by commas (up to 30). For example an old product name, price or delivery time. Here we entered “legacy system” and “7 days”.
2	Problem summary	In order: slides with no notes, slides with repeated notes, slides containing a listed term, and uncertain matches.

To see exactly which slides are affected, set the Show filter to **Needs attention** (1). The list then shows only flagged slides (2):

Show Needs attention Find Page, title or notes ☐ Ignore whitespace-only changes

Inline changes Side by side

Send the follow-up guide after the session.

Copy updated notes

Figure 11. Show = Needs attention

Flag	Meaning	Suggested action
Check page match	The automatic pairing is uncertain (based only on title or position)	Check Earlier slide, then click Confirm
Slide text changed, notes did not	The slide's text changed but its notes did not	Check whether the notes were missed
No notes	The slide has no speaker notes	Confirm it is meant to be empty
Repeated notes	Same notes as another slide	Possibly copied and not edited
Old term: ...	The notes contain one of your listed terms	Fix it in the deck, then load it again

6. Step 5: Export and reading mode

Figure 12. The 04 / TAKE IT export section

	Button / area	What it does
1	Reading speed	How many characters per minute you read aloud (spaces not counted). Default 240; allowed range 60 to 1000.
2	Time estimate	Estimates recording time from the total characters on slides marked Record.
3	Download HTML checklist ↓	Downloads an HTML checklist: each slide's decision, flags, changes and full updated script, with a checkbox per slide. You can print it or save it as a PDF.
4	Download recording script ↓	Downloads a .txt script with only the slides marked Record . If none are marked, it shows "Mark at least one slide Record first."
5	Download all notes ↓	Downloads a .txt with the notes of every updated slide.
6	Save project ↓	Saves a .json project file (extracted text, pairings, decisions, old terms and settings) that you can reopen with Resume saved project.
7	Open reading mode ↗	Opens full-screen reading mode, showing the slides marked Record one at a time.

After each export, a message under the buttons confirms "Created <file name>":

Figure 13. Export confirmation

Speaker notes checklist

training-deck-v1.pptx → training-deck-v2.pptx

Generated locally. Tick boxes during review; print or save a PDF to keep those marks. This HTML file does not save checkbox changes automatically.

☐ Slide 1: Welcome

No rerecording

Earlier: slide 1 · unchanged notes

Welcome to new hire training. Today we cover system setup and the delivery process.

Updated full script

Welcome to new hire training. Today we cover system setup and the delivery process.

☐ Slide 2: Delivery time

Record

Earlier: slide 2 · changed notes

Standard delivery takes ~~7~~10 days. Remind the customer to confirm the shipping address and phone number.

Updated full script

Standard delivery takes 10 days. Remind the customer to confirm the shipping address and phone number.

☐ Slide 3: Hands-on exercise

Record

Earlier: no match · changed notes

Old term: legacy system

Ask everyone to complete one system setup. If they get stuck, they can check the legacy system manual.

Updated full script

Ask everyone to complete one system setup. If they get stuck, they can check the legacy system manual.

Figure 14. The downloaded HTML checklist (excerpt)

Checkboxes in the checklist are **not saved automatically**. To keep your ticks, print the page or save it as a PDF from your browser.

Reading mode

Use this view while recording: large text, one slide at a time.

Figure 15. Reading mode

	Button / area	What it does
1	Slide number	The slide's number in the updated deck.
2	Progress	Position among the slides to record, e.g. 1 / 3.
3	Close x	Closes reading mode (or press Esc).
4	Script	The slide's full updated notes.
5	← Previous	Previous slide (← key).
6	Mark done	Marks this slide Done and moves to the next one (or press Space). When every slide is done, reading mode closes and shows “All marked recording slides are done.”
7	Next →	Next slide (→ key).

A slide marked Done is no longer marked Record, so finished slides drop out of reading mode and the recording script. What is left is what you still need to record.

7. One-deck mode

To check or export the notes of a **single** PPTX, click **One deck** (1). The earlier-file box is hidden. Pick one file under Your PPTX (2), then click **Read speaker notes** ↗.

record, and take a checklist and talk script with you.

01 / INPUT

Resume saved project

Working data cleared from this tab.

FIRST TIME? Practice with two fictional decks, then follow the step-by-step guide.

Earlier deck ↕

Updated deck ↕

PDF guide ↗

PPTX only · up to 30 MB and 500 slides per deck · the example uses fictional content.

Figure 16. Input section in one-deck mode

Figure 17. One-deck result: all notes in order, with no comparison

In one-deck mode every slide starts as To review, the second summary box becomes WITH NOTES (slides that have notes), and 03 / CHECK and all exports still work.

Switching modes while results are loaded **clears your current work**. Save a project first if you need it.

8. Saving and resuming your work

1. In 04 / TAKE IT, click **Save project** to get a .json file.
2. Next time, click **Resume saved project** in 01 / INPUT and choose that file.
3. The page shows “Project restored: N slides.” Pairings, decisions, old terms and reading speed are all restored.

You do **not** need to load the PPTX files again. The project file contains the full slide text and notes, so keep it as safely as the original deck.

9. FAQ and limits

Question	Answer
Which files are supported?	Standard .pptx only, up to 30 MB and 500 slides per file. Old .ppt files and encrypted or password-protected files are not supported.
What exactly is read?	The text in the standard speaker notes area. Slide text is used only to help pair slides and to find old terms. Text in images, charts, audio, animation and formatting is not read.
Will it change my PPT?	No. The tool only reads files and never writes back to them.
I reordered slides. Will they still match?	Yes. Slides with identical content are paired automatically. Pairings guessed from titles or position are flagged Check page match for you to confirm.
Does “Changed notes” always mean rerecording?	No. For a typo fix or punctuation change you can choose No rerecording. The decision is yours.

Screenshots show unjamkit.com/ppt-notes/ as of October 2026. The practice decks contain fictional content.
